One content studio.

All run from Slack.

WHY NOW

Agents are moving into Slack

OpenAI and SpaceXAI both put AI agents inside Slack this autumn. Here's what running automation there looks like in practice.

WHAT WE BUILT

A Content OS

22 workflows, every one triggered from Slack. Three of them carry the studio:

WHY SLACK

The team already lived there

So nobody had to learn a new tool.

OpenAI launches Dots, always-on agent coworkers

Agents that keep working alongside human teams.

Why it matters: clients will ask for agents in their own Slack.

Google is replacing Gemini Gems with Skills

Saved instructions you call with a slash.

Why it matters: an easy explainer for founder audiences.

WORKFLOW 2

Ideas on autopilot

A scraper checks creators and keywords twice a day and files every new idea.

Afternoon scan · 5 new ideas filed

- › Behind the scenes: a studio run from Slack keyword · slack automation
- › Three agents every agency should test keyword · ai agents
- › Blank page vs one-click script creator watchlist

✓ All 5 filed to the idea board

WORKFLOW 3

One click, one script

Any idea becomes a 30, 60 or 90-second script or a LinkedIn draft, then moves into the weekly plan.
