

5 AI agents **every founder needs**

THE IDEA

An agent = Claude + one job + your tools

Give Claude a role, a few rules, and access to the tools you already use. Save it once as a Project – it shows up every day after that.

THE 60-SECOND RECIPE

One template builds all five

Paste this into a new Claude Project and fill the blanks:

Role: you are my ____.

Goal: every ____, do ____.

Tools: Gmail / Sheets / Notion / ____.

Rules: always draft, never send.

Output: ____, delivered to ____.

The Rules line is the whole game. Agents draft, you send — that one rule keeps five agents safe to run.

THE UNLOCK

Connect once, runs forever

Link your tools once in Settings → Connectors, save each agent as a Project. From then on it's one message — or a schedule.
